

## The Keexle Open Source Project

Secure & collaborative cloud apps with Keexle's end-to-end encryption.

github.com/keexle

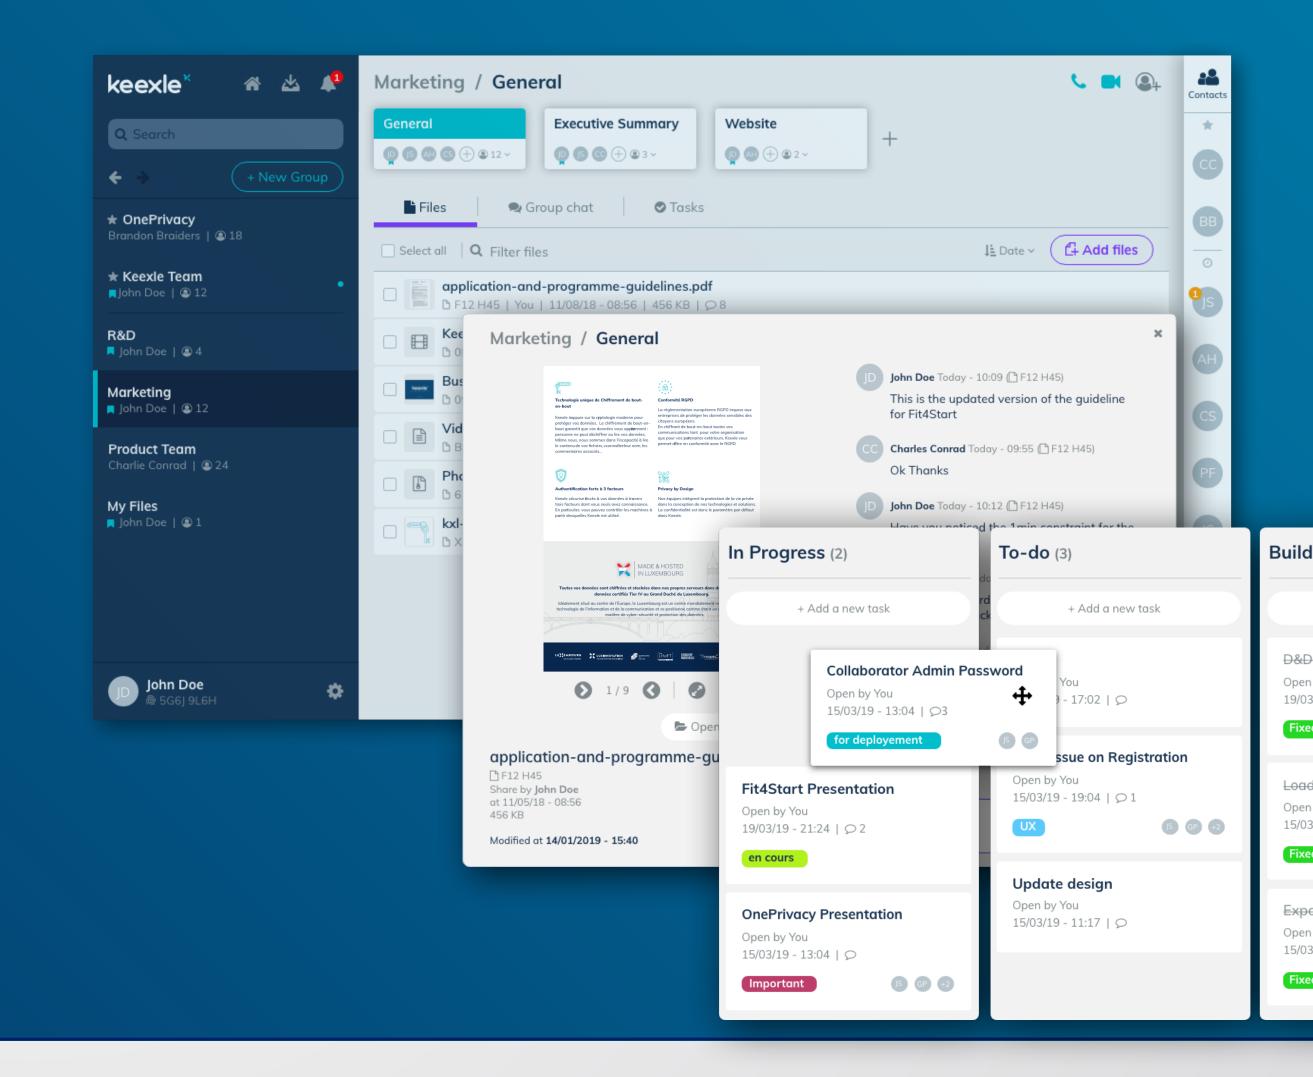

#### Our mission

### Privacy by Design

Provide people and businesses with the best tools to protect their right to privacy when communicating and collaborating over the Internet.

Our products and solutions conform to the notion of Privacy By Design.

#### The problem

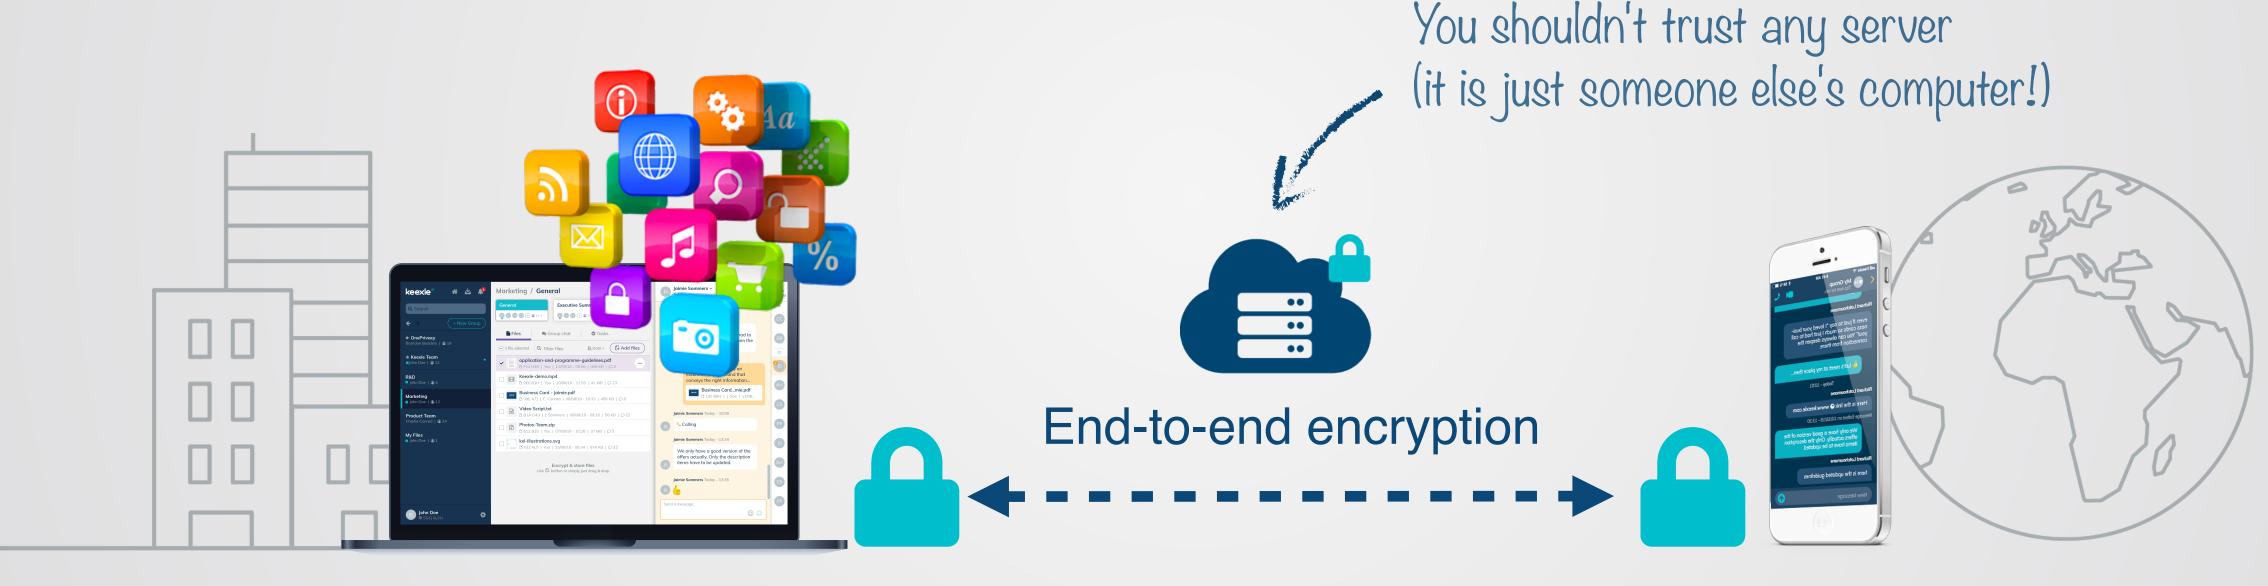

#### There is no cloud

It's just someone else's computer

- You don't control your data.
- You don't know who accesses your data
- You don't know how your data is being used and for what.

#### Our innovation

### Redefining cloud collaboration for privacy

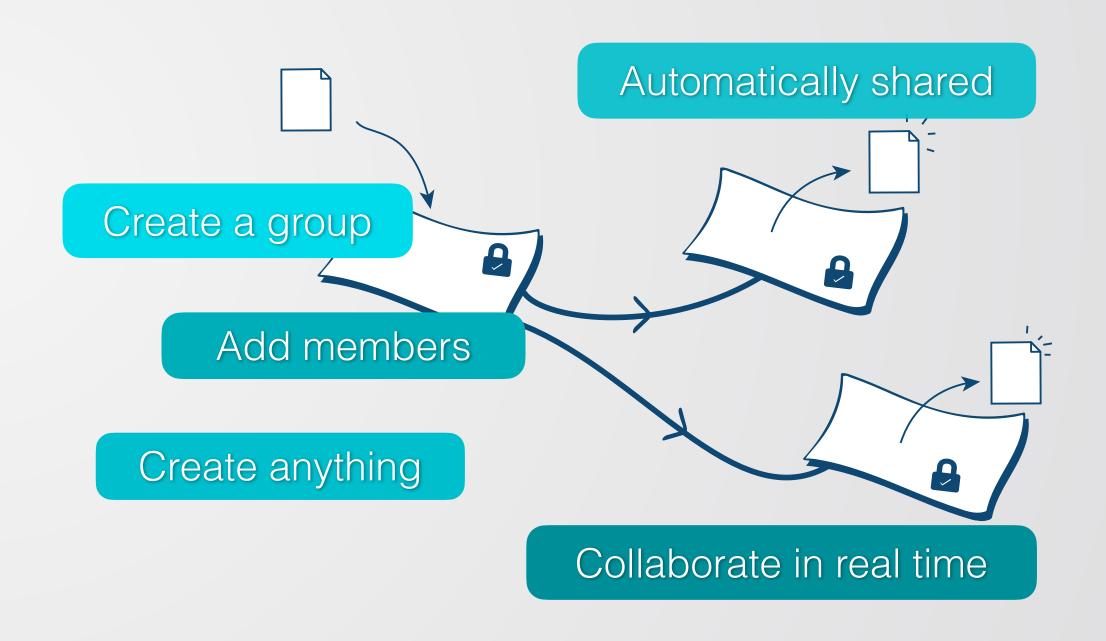

Collaborative app

Collaborative app

#### What we propose

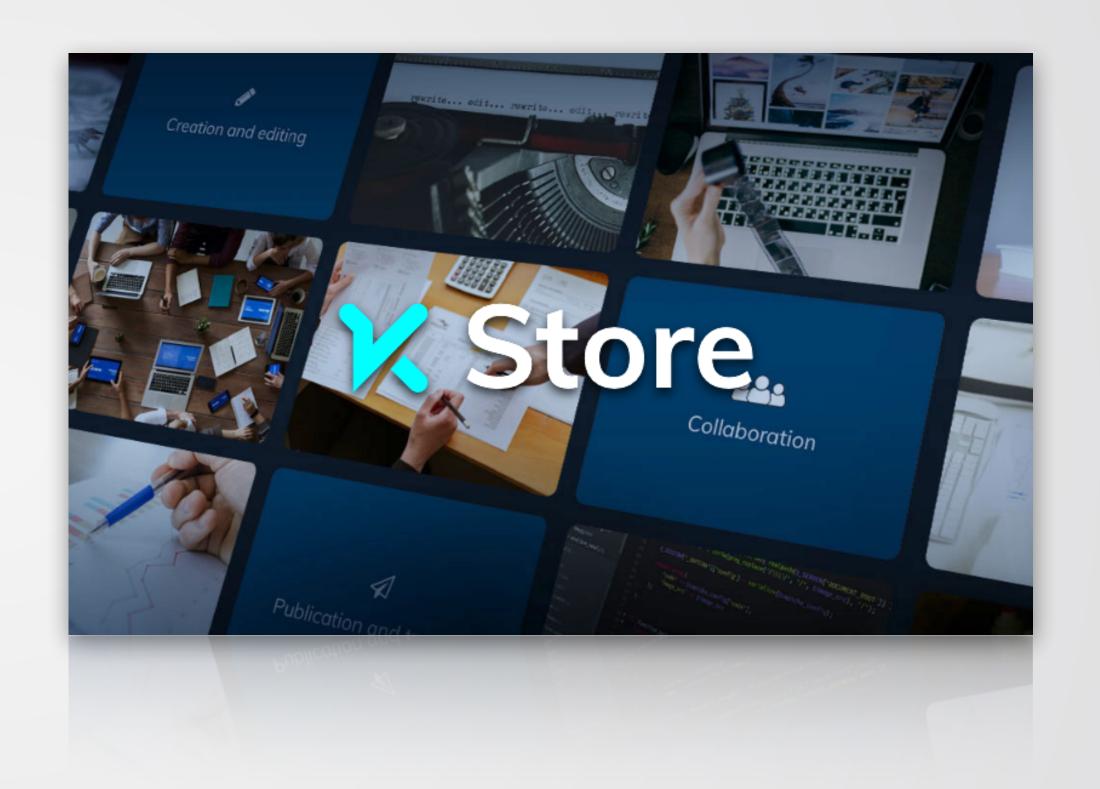

### An open source SDK to guarantee privacy for a wide range of use cases and tools.

- Automatic encryption of any type of content
- File Version Control system
- Fined grain access control
- Synchronisation between users and devices
- Cross-platform

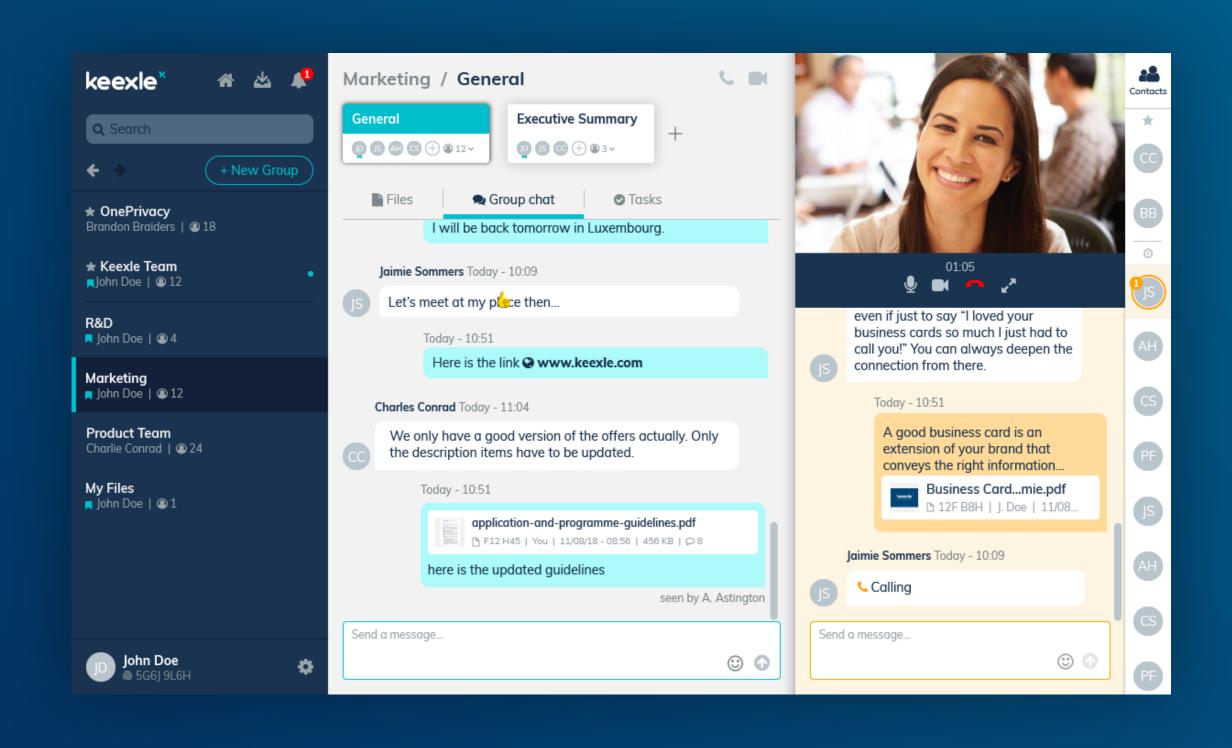

#### What we want to be

The first Marketplace for cloud based applications that can guarantee total user privacy

# Our first application **Keexle** Kall the features of the Cloud. Totally confidential.

Synchronised file sharing

Private chat with Keexle Messenger

Group discussion and sharing

Audio and Video Conference

Collaborate with several people on your documents

Plan your projects as a team

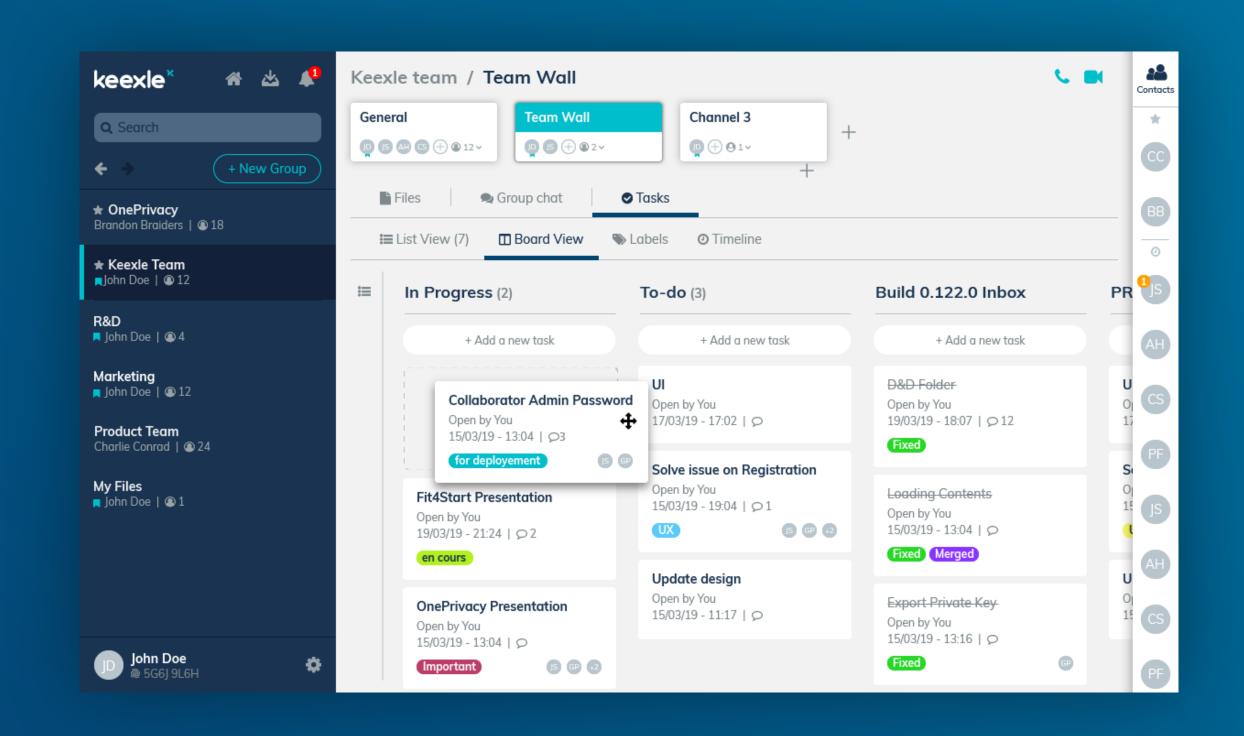

Completely secure Group Video Conferencing

Manage Licenses for team members and partners

### keexlex

### Unique features to optimise longterm or temporary projects.

#### Opportunities for collaboration

- Identify areas and use cases where privacy is at risk
- Develop solutions to use-cases
- Educate and raise awareness
- Co-develop and improve SDK
- Increase the developer base
- Increase the community of users
- Find financial partners and support
- Legal support (privacy related)

#### Possible use cases and applications

#### **Trade secrets**

- Corporate documentation
- Classified information
- Laboratory digital notebooks
- Collaborative editing of patents

#### Legal

- Secure Dataroom
- KYC management
- Secure video conference call
- Online signature
- Customer acquisition sharing tools

#### Healthcare

- Digital medical records
- Online medical appointments
- Anonymous survey

#### Entertainment

- Private photo album for families
- Video games

#### Businesses

- Board of Directors
- Deliberation and votes of partners

## keexle<sup>x</sup> for Education

An initiative to build and share knowledge freely

edu.keexle.com

#### The problem

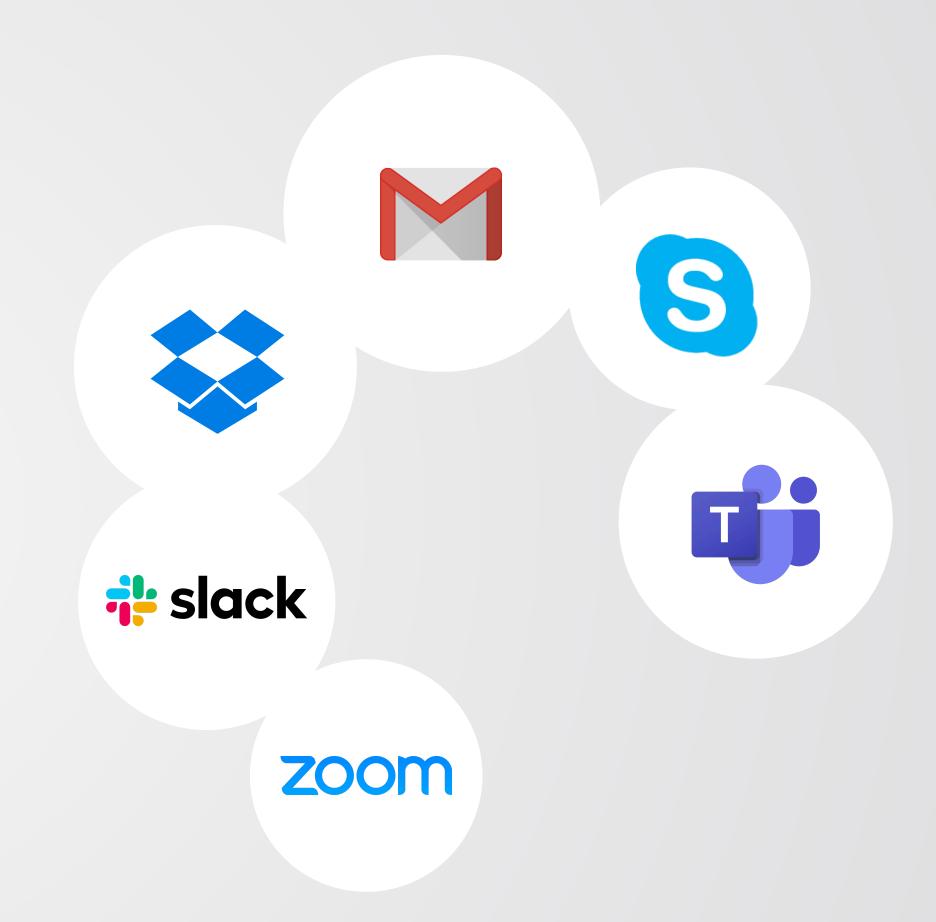

School management and learning platforms are now cloud based

Convenience

Privacy

Secure and private alternatives are resource consuming and require IT expertises

### The problem

- Personal data at risk
- Capture of (scientific) knowledge by private companies & hostile state actors
- Student privacy

## keexle Keexle for Education

Protect the rights of user's data when sharing and collaborating

Ensure users that every effort is made to ensure that their content is not exploited without their consent.

## keexle Keexle for Education

Share documents, lessons, reports, homework, have videoconferences

For research or education

Prevent data leakage to public web

Total privacy

## keexle<sup>x</sup> for Education

#### We need you to ...

Develop specific teaching tools (e.g. homework assignments, online surveys/exams, collaborative editing)

Educate and raise awareness

Define RnD projects related to privacy (e.g. encryption with IoT, peer-to-peer, Ergonomics)
